

Bajaj Health Frontend Challenge (Qualifier 1)

(19th May 2023)

Objective

To render data from JSON with appealing UI

Logic

Mandatory:

1. Source for JSON data:
<https://raw.githubusercontent.com/dixitsoham7/dixitsoham7.github.io/main/index.json>
 - *If you are unable to make an API call to retrieve JSON data from the above link, you can download the JSON and store it in your code.*
2. Render the JSON on the screen with a visually appealing UI (mandatory). Try to display as many fields as possible.
3. Implement a filter/search functionality for your page (good to do).
 - a. Allow search by name.
 - b. Provide the ability to filter developers by their designation/skills.

Optional:

1. Create a table that showcases all the projects along with their respective team sizes and the number of completed tasks.
